Understanding WeBWork Problem Pages

The WeBWork screen is divided into several areas, each used for a different purpose. You will need to understand these in order to use WeBWork effectively.

At the upper left are the navigation buttons that allow you to move from problem to problem. The "Next" and "Previous" buttons, naturally, send you to the next and previous problems. The "Problem List" button takes you back to the opening page for the homework set (the one that lists all the problems and gives the instructions for the homework set).

The area below the navigation buttons is where WeBWork tells you about your score for the current problem. When you have submitted your answers, this is where you will be given information about what answers you got right and wrong. This area also shows you how many points a problem is worth.

The main part of the page is the text of the problem you are trying to answer, including blank boxes for you to enter your answers. (There aren't any such boxes on this page, because you are not being asked any questions here, but usually there will be one or more answer

WebWorK error

An error occurred while processing your request. For help, please send mail to this site's webmaster (webwork@maa.org), including all of the following information as well as what you were doing when the error occurred.

Sun Aug 23 21:02:59 2020
