

WeBWork error

An error occurred while processing your request. For help, please send mail to this site's webmaster (sunglee@usm.edu), including all of the following information as well as what you were doing when the error occurred.

Fri Nov 22 19:40:36 2019

Warning messages

- Non-fatal warning: file /opt/webwork/courses/MAT_167-Fall2019-Lee/course.conf contains at least one character code which is not valid in UTF-8. (The copyright sign is often a culprit -- use '©'; instead.) While this is not fatal you should fix it. It looks like the database is missing a column. You may need to upgrade your course tables. If this is the admin course then you will need to upgrade the admin tables using the upgrade_admin_db.pl script. at /opt/webwork/webwork2/lib/WeBWork/DB/Schema/NewSQL/Std.pm line 834.

Error messages

```
DBD::mysql::st execute failed: Unknown column 'useWirisEditor' in 'field list'
at /opt/webwork/webwork2/lib/WeBWork/DB/Schema/NewSQL/Std.pm line 837.
```
